

3. Enet. A Unique Lobby

We are firmly convinced that the strategies applied to protect the gamblers and to maximize the profits of our partners make Enetpoker a unique network of international level. Hence our motto: "Enet. A UNIQUE LOBBY".

We therefore present the comparison between the two indicators of the game level of a lobby poker, which are usually represented by:

- Percentage of flop seen from the gamblers
- Gamblers waiting on the tables

Percentage of flop seen from the gamblers

Usually a high percentage of flop is an indicator of a relatively low level of game because the classic occasional gambler is bound to see a larger number of flop with respect to an expert gambler that plays in a more solid way.

3. Enet. A Unique Lobby

Gamblers waiting on the tables

It is tedious to run a lobby where the full tables are relatively few and those with waiting gamblers are relatively too much. This concept is proved from the following screenshots.
